

1. Road Traffic Accident in the field

You and your team of three (including the driver) working in the field are driving to a meeting in a nearby town. You leave your office early in the morning for the approximate 2 hour drive to the meeting, making sure that you leave plenty of buffer time to arrive in-time. Approximately halfway through your journey, passing by an open-air market, a cargo motortrike comes out of a side street and collides with your vehicle.

What would you do?
